1. Community Support

Community based support is available from the [forums](#) and [mailing lists](#) or by [emailing me direct](#).

However while the software is still fairly new and most of the customization options require to use the technical tools it is recommended that a local open source friendly business become involved.

Any local company with technical expertise to setup servers, install and upgrade software, and manage databases. Most of the configuring of the system does not require Java programming but will would include some Javascript.

2. Professional Support - Texas

[Brotay Incorporated](#) is a Texas based company providing hosting and support services. Brotay is experienced in the support of large, multi-site Hospital Information Systems.

3. Professional Support - US Midwest

[Technotic, LLC](#) is an Indianapolis based IT consulting firm that offers on-site setup and support.

4. Professional Support - Massachusetts

[Contact me](#) for support options in Massachusetts.
